Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's election with traverse of claims 26-32 in the reply filed on 2/22/07 is acknowledged. The traversal is on the ground(s) that a "wireless communications system" is a genus with a species of "infrared communications systems." This is not found persuasive because of the different classification of the two..

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 26-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Janky et al.

Janky et al disclose a wireless communication (col. 9, lines 33 – et seq.), said wireless communication system comprising a holder arranged to support a portable electronic device in at least two orientations and a wireless communication device mounted to communicate with said portable electronic device positioned within said holder (abstract), said holder formed of a material that is generally transparent to wireless signals and that is optically opaque (col. 9, lines 33 – et seq.), said wireless communication system comprises a transceiver that is disposed to one side of said holder (col. 9, lines 33 – et seq.), said wireless communication system comprises a

Art Unit: 3764

transceiver and said holder is disposed between said transceiver and a user of said exercise machine (col. 9, lines 18 – et seq.), a transceiver and said transceiver is remotely mounted next to said holder (col. 9, lines 18 – et seq.), said holder includes a generally cylindrical portion and a recessed slot portion that intersect to effectively hold accessories (fig. 1), a personal data assistant (abstract).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 32 is rejected under 35 U.S.C. 103(a) as being unpatentable over Janky et al in view of Brown et al.

Janky et al do not disclose a treadmill

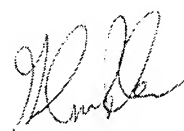

Brown et al discloses a treadmill using a PDA (col 7, lines 15 - et seq.)

It would have been obvious to use Brown et al's treadmill, with Janky et al's system, as it is well known to use a treadmill with a PDA, as taught by Brown et al, for providing a means of communicating exercise data..
